EDUCATION

Bachelor of Arts

Saint John's University, Collegeville, MN

Major: Computer Science, Minor: Finance

Expected Graduation: May 2027

Cumulative GPA: 3.65/4.0

Major GPA: 3.80/4.0

Relevant Coursework: Data Structures, Discrete Computational Structures, Software Development, Computer Organization, Data Communication & Networks, Operating Systems, Ethical Issues in Computing, Theory of Investments

AI & TECHNICAL SKILLS

AI & Agentic Development: Claude Code (skill, rule, and subagent authoring), context engineering, agent-assisted development workflows, LLM API integration (Anthropic, OpenAI)

Certifications: Anthropic — Claude Code in Action (Aug 2026); Claude Code 101 and Claude 101 (Jun 2026)

Programming: Python, Java, JavaScript, HTML, CSS, SQL

Frameworks & Tools: React, Vite, Node.js, Supabase (Postgres), Vercel, Vitest, JUnit, Git, Linux, IntelliJ

Other: Microsoft Office Suite, Adobe Creative Cloud (Photoshop, Premiere, After Effects)

PROFESSIONAL EXPERIENCE

HTML Developer & Content Deployment Specialist — WAND Digital, Eden Prairie, MN

May 2025 – Present

Full-time summers 2025 and 2026; retained part-time as a project-based remote developer during the academic year.

- Built the Integrations Search Tool, a React and Vite web app that catalogs ~15 restaurant POS integrations and normalizes every vendor's response into one canonical field set; ~1,260 automated tests, deployed on Vercel.
- Authored a reusable library of Claude Code skills, rules, and documentation that teammates install with one command, turning individual AI-assisted workflows into repeatable team standards.
- Built an automated QA tool that renders finished menu boards in the production runtime and measures layout defects and text overflow, replacing a manual visual check across dozens of boards.
- Designed an hourly Supabase pg_cron and edge-function pipeline that versions a third-party signage contract only when it changes, validating on write and read and surfacing provenance in the UI.
- Develop live menu boards in HTML/CSS/JavaScript for national restaurant brands under legacy-browser constraints.

Classroom & A/V Support Technician — CSB/SJU, St. Joseph, MN

Aug 2023 – Present

- Support classroom technology and partner with faculty so presentations and campus events run smoothly.
- Edit and optimize recorded lectures for clarity and accessibility.

Finance Intern — Perrill, Minnetonka, MN

May 2024 – Aug 2024

- Balanced account statements, validated transactions, and analyzed client financial data for reporting and process improvement.

LEADERSHIP & CAMPUS INVOLVEMENT

Treasurer — Computer Science Club, Saint John's University

2026 – Present

- Manage the club budget and funding requests, and help organize the club's upcoming game jams and hackathons.

Co-Led Class Session — "AI & Automation," Ethical Issues in Computing

Fall 2025

- Ran a live exercise in which classmates rebuilt their semester-long course project in ~20 minutes using Claude, Bolt, and Codex, then led discussion on what agentic tools change about software work.

Member — Club Ultimate Frisbee, Intramural Basketball

PROJECTS

Stearns Bank Hackathon, CSB/SJU — 1st Place

Apr 2024

- Prototyped an AI-powered customer support assistant and designed accessibility features (translation and text-to-speech) to improve banking inclusivity.

CMC (Choose My College) — Full-Stack Java Application

Spring 2025

- Built a college search platform with role-based access and saved-school workflows; developed CLI and JSP interfaces and tested the backend with JUnit.

Basketball Season Simulator — Python, Tkinter, OpenAI API

Dec 2023

- Built a GUI application simulating NBA seasons and playoffs with a custom expansion-team mode; integrated the OpenAI API to generate team logos and names.
